

# Milk Jug Bird Feeder

## What you need

- Milk Jug
- Bird Food
- Scissors
- String
- Chosen resources to decorate with such as paint a glue.

## How To

- Children help to the inside of the milk jug and cap with soapy water
- Children to be guided in using scissors to cut large enough holes at the side of the jug for the birds to get into.
- Make two holes, holes near the top of the jug for putting strings in to hang onto the tree
- Cut your string to your desired length and insert it into the small holes at the top of the jug that you made.
- Children can then decorate the jug using different things such as paint
- Hang the new bird feeder onto a tree or fence where the birds can easily go and feed, children can visit the feeder often looking out for the different creatures that visit.
