

## Music Fun – Pots and Pans

Time to empty your kitchen cupboards and let your child have some fun making sounds with pots and pans. This is a great sensory experience for all ages 0-5 years.

### You could use

Pots and pans

Wooden and metal spoons

Measuring jugs

Bowls

Whisks

Cake tins

Let your child explore the different sounds they can make. Join in with them and have fun. Be loud, quiet, soft, and gentle. Use spoons as beaters or bare hands. For older children experiment and ask questions. Stack pots and pans on top of each other. Do they sound different? Do the different utensils sound different?
