

Spider web game

What you need

- Basket
- Small insect pieces or small toys
- Peg

How To

Take your basket, weave some string through to make a “web” and add some bugs or toys into the bottom. Then give children tweezers or clothespins and let them get the items out of the web. Use more or less yarn depending on the abilities of the children. The more string you weave around the basket, the more challenging the activity will be.
