

### Shaving Foam Activity

Find a large mixing bowl from your kitchen cupboards and fill half way using shaving foam. Then add a few drops of food colouring, you can encourage your child to choose what colour they would like to add if you have a variety.

Encourage your child to use their hands to feel the textures and get messy and creative, you could also add wooden spoons or cotton buds to extend the fun.

Furthermore, encourage your child to draw out letters and numbers on a tray with the shaving foam.
