

Nature Necklace

What you need?

- Leaves
- String
- Two 4inch sticks

How to?

First make a simple needle by tying a stick to both ends of a string, having a stick on either end of the string stops the leaves from falling off.

Children can enjoy pushing their natural stick needles through the leaves (leaves can be bigger or smaller depending on your child's ability)

Once finished pull the stick off the ends of the sting and tie the ends together, then you will have your nature necklace.
