

Ice Boats

What you need

- Straws
- Ice tray
- Food colouring (optional)
- Paint
- foil

How to

First mix up some coloured water and pour it into your ice cube tray. Next, wrap the tray in foil.

Cut up four straws into thirds and poke the straws in through the foil as the mast of the boats and freeze.

Your child can then paint a piece of white paper to make our colourful sails.

Before you attached the sails, make sure to “crack” the ice cube tray so the boats would be easy to remove.

Cut the coloured paper into triangles and taped them to each straw, your boats are ready to sail.
