

Outdoor Music Wall

Why not use your old pots and pans to create an outdoor music wall?

You may choose to attach the items on a large piece of cardboard which you can use indoors and outdoors.

Use a selection of materials to create different sounds. Glue or tie a range of unused items you have at home to a board. This could be old baking trays, tree branches or even milk bottles.

Ask your child to describe the textures of the items and listen to the sounds created when tapping, banging and swiping each item.

How do they feel when they hear a loud sound? How do they feel when they hear a quiet sound?
