

Minibeast Movements

Below you will find pictures of a range on minibeasts

Talk to your child about what these minibeasts are called and how they may move, for example, you may flap your hands to imitate a buzzing bee or you may crawl like a centipede.

Find a space where you can make big movements, this can be indoors or outdoors.

Hold up a picture of a minibeast, one at a time and encourage your child to move like the minibeast they see.
