

Nature ice

How to?

Collect leaves, seeds, flowers, pebbles, anything that catches your eye in the garden.

Fill a tub with water and place the items in the water then put it into the freezer.

Once it's frozen, bring the block out and talk about what has happened to the items.

Ask your child how does the ice feel?

Leave the ice outside while you're playing and check back to see what's happening, talk with your child about what has happened to the ice.
