

Blowing Bubbles Activity

What we found works best was the sturdy cardboard roll that holds aluminum foil or cling wrap. It holds up very well.

Using fairy liquid as bubble mix:

To blow our bubbles, simply pour a couple of tbsp. of Fairy Dish Soap into the bottom of a shallow bowl.

We dipped the end of the tube in, and blew, and wow! It totally worked!

Just go slow with the dipping, and try not to work up too much of a froth in your bowl. Too much foam will prevent your detergent from working.

Just dip, hold, lift. No swishing or tapping up and down with the cardboard roll, okay?
