

Create your own water slide!

Why not make use of your back garden and have some fun!

You will need:

A large camping tarp or clear plastic sheet

Shampoo

Water hose

Instructions:

Place the sheet of tarp or plastic on the garden floor (You may want to place something on the edges to weigh it down)

Add some shampoo to the surface (This helps it get really slippery)

Position your water hose on your washing line facing down towards the mat

Enjoy your very own water slide!

This can get messy and is very slippery so please supervise your child at all times ☺
