

## **Planting Project**

With the sun out it is the perfect time to start planting some of our favourite fruits and vegetables.

### **You will need:**

Plant pot

Seeds

Compost

Water

### **Instructions:**

Speak to your child about what they would like to grow.

Go shopping together and encourage your child to pick out all the essential items.

When you are home encourage your child to fill up their plant pot with compost.

Place the seed.

Add some water.

Watch the magic unfold!

Why not ask your child to observe their plant each day and write down their findings?
